
 **HONECORE™** Doors offer distinctive advantages over conventional doors in terms of usability. They are not just economical but also provide a cascading effect on cost savings to a construction company. Lightweight doors reduce the dead weight on the building, require much lesser reinforcement on the hinges and also provide the same aesthetics as the conventional doors as the outer body is the same with a frame and conventional facing materials.

Benefits of **HONECORE™** to Door Manufacturers

- **Eco-friendly**

Made from Recycled paper, and non-toxic adhesives  **HONECORE™** is an eco friendly substitute for wooden doors.

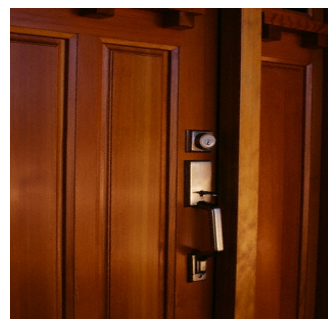

- **Excellent weight to strength ratio.**

- **Faster productions leading to economies of scale.** Ready-to-use sizes and minimal requirement of tools lead to higher and faster production that give you the advantage of higher production in the existing facility leading to more efficient use of labour. All this combined,  **HONECORE™** gives you the edge in a highly competitive market

- **Highly cost effective in comparison to wood.**

 **HONECORE™** Expands to fill more space with less material that leads to very efficient usage of raw material. This gives you the advantage of using a highly advanced material to cut costs and optimize margins.

- **Termite and borer proof, hence long lasting.**

- Reduced wastage.
- Minimum storage space
- Tough and durable
